

**DISCLOSURE OF INFORMATION ON RESIDENTIAL SEWERAGE TREATMENT SYSTEMS**

**Property Description (Address)** \_\_\_\_\_

**City, State, Zip** \_\_\_\_\_

**SELLER OF RESIDENTIAL REAL ESTATE:** Complete this disclosure document if city, town, or municipality waste treatment does **not** serve the property described herein.

Improperly treated or partially treated residential sewage poses significant risks to human health and to the environment. Untreated or poorly treated water contains parasites, bacteria, and viruses that cause serious disease. D.H.H Title 51, Subsection 707 states: "Individual sewerage systems shall be kept in service and in serviceable condition sufficient to insure compliance with this code and in order to avoid creating or contributing to a nuisance or public health hazard."

**HEALTH HAZARDS AND DISEASES**

**Gastroenteritis** – severe inflammation of the intestines that may cause severe vomiting and diarrhea leading to dehydration.

**Severe infection** – result of contact with untreated water where there are cuts or abrasions on the skin.

**Hepatitis** – serious infection of the liver that can lead to long term illness.

A residential sewerage treatment system that is not properly operated or maintained may also result in the pooling of improperly treated water at the surface. **Health risks also exist from mosquito infestations that may cause West Nile Virus, Encephalitis, and other diseases. Improperly operating systems may be subject to fines and penalties under Louisiana law.**
